

The following pages are the layout for the lumber, pay close attention to your layout and cuts. In most cases you have exactly the amount of lumber needed with almost no waste.

4x4 material

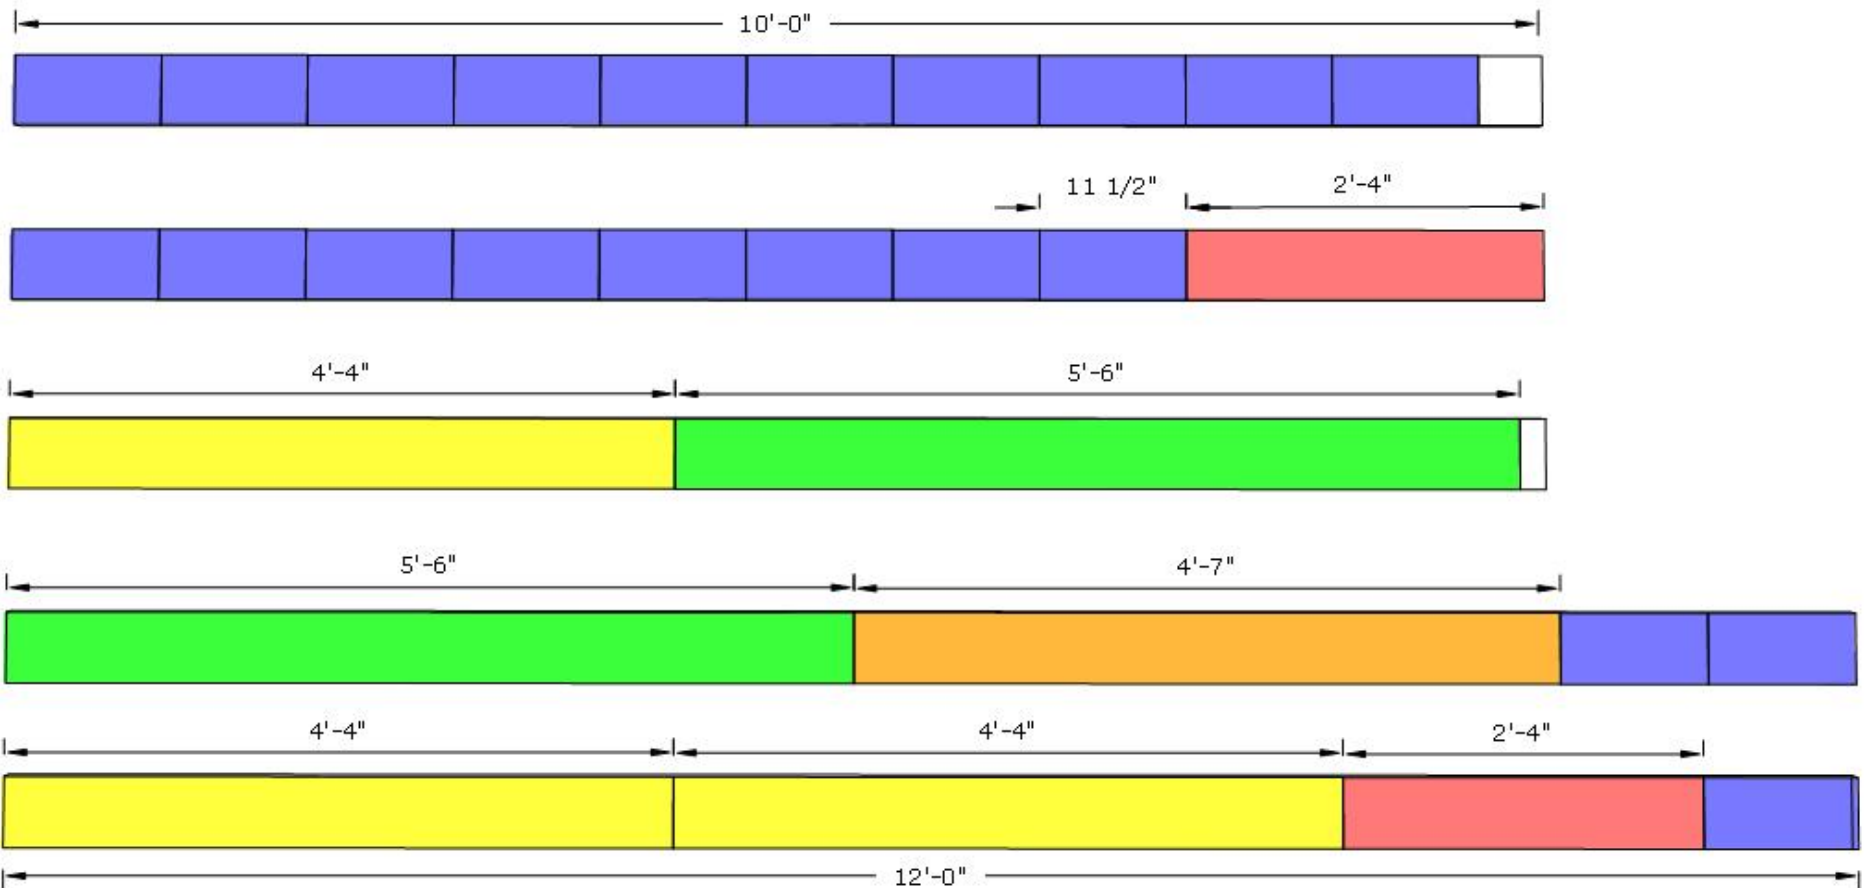

- This material is all 2x4 and must be cut to the exactly as shown.
- There is almost no extra material, therefore no room to make the wrong cut.
- If you do make a wrong cut, please make whatever alterations necessary to complete the project as close to the scope as possible.

	Bench supports
	Tabletop middle structure
	Tabletop edge
	Table top and table base
	Table base support brace
	Bench structure

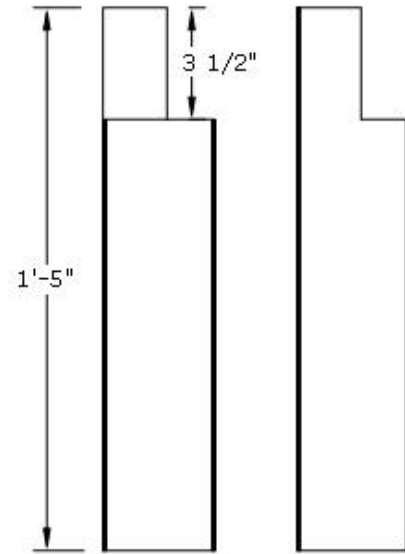

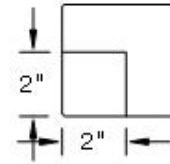

YOU HAVE EXACTLY ENOUGH DECKBOARD TO FINISH - FOLLOW THIS CUT LAYOUT OR YOU MAY NOT HAVE ENOUGH TO FINISH

	Table top fill boards (pieces are measured to 11 1/2" for extra cutting space. final size should be 11 1/4")
	Tabletop end boards
	Bench boards
	Tabletop edge boards
	Table centreline board

- Right table leg and left table leg dimensions are identical.
- the only difference will be the location of the mortise. 2 will be on the left and 2 will be on the right.
